

Daily Update

April 21

Geological Work

Devil's Slide (post mile 39.14)

- Manual rock scaling operations continued today. Small amounts of explosives were used to break up several large boulders. Over the weekend, additional large boulders will be reduced in size and rocks cleared from the road. By first thing Monday morning, the drill crew will return to Devil's Slide to resume operations.

Repair Work

Slide at Post Mile 40

- Repair work progressed today by excavating soil below road level. The work will continue Saturday. Sufficient soil must be removed to get down to the slide plane. Rocks (rip rap) will be used as backfill to stabilize the hillside.

Traffic Operations

- As requested, flexible vertical lane markers, 'channelizers', were installed on Highway 1 and Highway 92. These should improve traffic flow in the Half Moon Bay area by preventing lane changes that slow overall traffic flow.
